

TRITON Passenger Vest #497-PAX

The TRITON flotation vest provides variable buoyancy up to 35lbs using a manually inflated CO2 cylinder. The folding pattern and snap closure create a comfortable low-profile fitting around the neck. Three utility pockets on the front of the vest allow for storage of auxiliary equipment. The vest comes equipped with an LSC survivor locator light that is visible up to 3.5 miles depending on atmospheric conditions. An oral inflation valve allows the wearer to adjust buoyancy, as needed.

The attachment harness is constructed of Mil-Spec webbing and low profile, quick adjusting, stainless steel hardware. All components and materials are corrosion resistant for the marine environment.

(Available in MOLLE as the 497-PAX-M)

Technical Specifications:

TSO-C13G

<i>Weight</i>	3lb (1.36kg)
<i>Vest Buoyancy</i>	Up to 35lb (155N)
<i>CO2 Cylinder</i>	33 grams (LSC #484)
<i>Size</i>	Adult, one size fits most
<i>Weight Limit (Min)</i>	90lb (41kg)
<i>Survivor Locator Light</i>	FAA TSO-C85B (LSC #641-LRS) Strobes 60-flashes/minute Automatic water-activation
<i>Service Life</i>	12 years from date placed in service or 15 years from date of manufacture, whichever occurs first
<i>Service Conditions</i>	Documented positive annual in- service inspections. TKTK
<i>Approvals</i>	FAA TSO-C13G
