

#490 Triton II Harness and Inflatable Vest

The TRITON is LSC's second-generation helicopter hoistable rescue harness with dual recovery capability. Constructed of Mil-Spec webbing and low profile, quick adjusting, stainless steel hardware. When hoisted the upright, slightly reclined, and seated position allows total use of operator hands. Ideal for rapid deployment in swift/cold water or cliff type rescues. Wide leg and waist straps optimally distribute weight for superior comfort and support. All components and materials are corrosion resistant for the marine environment.
