

## #495 Collapsible Rescue Basket

The design features a 55% reduced stowage volume compared to the rigid style #499 basket. The bail assemblies fold into the rescue basket, and each side collapses for compact stowage. The basket is easily and quickly erected by simply lifting the bails and top rail assembly up, and then rotating the side supports down and is self-righting. Float covers are the same as the #499-B.

## #499-B Compact Rescue Basket

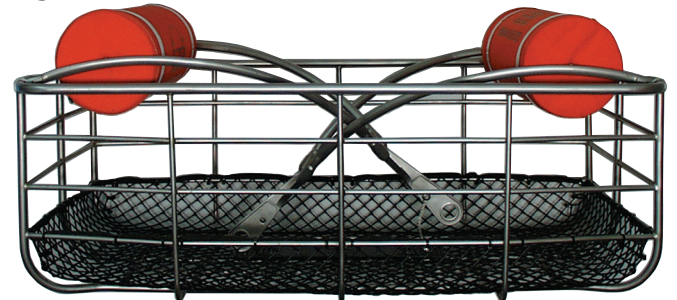

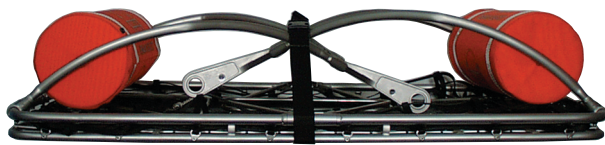

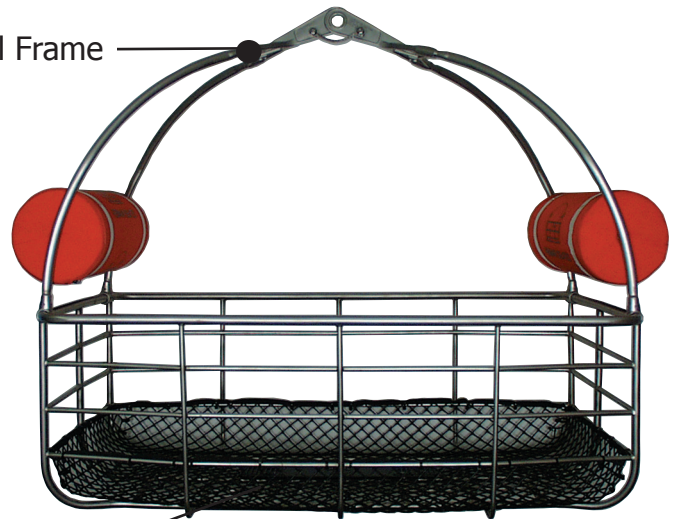

Standard equipment aboard all US Coast Guard rescue helicopters, and in service with numerous international military & civilian operators. This basket provides excellent flotation performance and is self-righting with 100% reserve buoyancy. Float covers have reflective markings and are printed with safety pictorials.

Stainless Steel Frame

Mesh liner, Openings 1"

1/2" nylon webbing sewn into a net form

### #495 Specifications

<b>Dimensions:</b>	Stowed: 44 1/2" (L) x 25" x 9 1/2" (H)
