Subject: Flammability Requirements for TSO-C13G

Dear Mr. Beach:

We have received your request to define the following items as "small parts" in reference to the flammability requirements of TSO-C13G:

Halkey-Roberts series 840 Manual Inflator

Halkey-Roberts series 740 Oral Tube

The Atlanta ACO Branch approves your request to define the above items as "small parts" that would not contribute significantly to the propagation of a fire for the purposes of compliance with Appendix 1, section 5.6.2 of TSO-C13G.

This letter does not constitute TSO approval but provides advance approval of the above definitions as required by Appendix 1, section 5.6.2 of TSO-C13G.

If you have any questions or need additional information, please contact Dan McCully at telephone 404-474-5548, fax 404-474-5566, or electronic mail at william.mccully@faa.gov.

Sincerely,

for Christina M. Underwood
Manager, Atlanta ACO Branch
