

226 Rescue Line Bag with 70ft line

The Rescue Line Bag is the solution for rapid and accurate deployment of a line for rescue or boat handling needs. A flexible ball (#229) is used in the nose of the bag to provide weight in windy conditions. It also offers superior accuracy and ease of use compared to other designs. The stowage bag is high visibility orange and constructed of UV resistant polyester fabric. Included is 70' of 3/8th solid braid, max grip line (#500) with excellent flotation, strength and abrasion resistant properties.

#232 Bracket for stowage, not included

Technical Specifications:
