

# 481 Pro Lite Vest

A lightweight and extremely comfortable vest for professional and commercial operators. The Pro Lite Vest features auto or manual pull-lanyard CO2 inflation. The beaded lanyard is easily identified by touch in an emergency. Vest may also be inflated orally and provides the SOLAS standard 35 lbs of buoyancy, more than twice that of a typical Type III PFD. The inflatable cell requires minimal maintenance, is constructed of 210 denier polyurethane-coated nylon, and is protected by a heavy-duty nylon cover for durability. When inflated, the high-visibility orange cell exposes SOLAS grade retro-reflective panels and attached whistle. Neoprene Collar for comfort. Quick release front buckle & stainless steel slide bar side adjusters. **Approved for USCG Personnel. FOR SALE TO MUNICIPAL OR FEDERAL GOVERNMENT AGENCIES ONLY.**
