

#745-MH Osprey Vest and Harness with Flotation Collar

Our most flexible and comprehensive modular design enables both aviation and maritime personnel to configure a lightweight, yet heavy duty ensemble tailored to their specific requirements or mission; ranging from a simple pilot or boat crew vest with minimal fixed equipment pockets to a tactical ensemble with integrated extraction harness, high buoyancy flotation collar, and MOLLE panels for custom pocket configuration. Modularity allows users to economically update the ensemble by only replacing worn or damaged components, and/or adding components in support of new mission requirements. Intended for aircrew or tactical personnel who may require deployment or recovery by helicopter hoist. The rear tether permits mobile aircrew members to securely restrain themselves while inside the aircraft cabin.

Shown with #740-BR Collar

Part Numbers:

#745-MH: Vest and Harness, Tether, MOLLE Panels
#740-B: Osprey Low Profile Flotation Collar
#740-BR: Osprey Low Profile Flotation Collar w/Retro
#740-P2: Osprey MOLLE Pocket, Large/Waist

#740-P3: Osprey MOLLE Pocket, Small/Chest
#740-P7: Osprey MOLLE Holster f/E-Air (Right)
#740-P8: Osprey MOLLE Pocket f/ICOM Radio
#740-P10: Osprey MOLLE Pocket w/Spray Hood

Flotation Collar:

The Osprey LPFC is an updated design of LSC's patented collar in use with the US Army Air Warrior and US Coast Guard aviation ensembles. Unique to the LPFC is the use of the mini-buckle attachment system permitting easy installation of the collar to any of the Osprey Vests, and allows the flexibility to dress for land or over-water missions. The portion of the collar that lies across the shoulders is only ¼" thick, eliminating interference with helmets common with other collars. Collar can be quickly replaced if damaged or removed for inspection. Buckles have been revised to provide a secure, tight fit between the collar and vest, eliminating slack and unwanted collar movement, while ensuring optimal in-water flotation performance by keeping the inflated collar close & tight to the body

#745-MH Osprey Vest and Harness with Flotation Collar

Weight:	3.2lbs (1.45kg) with Flotation Collar 5.8lbs (2.63kg)
Size:	Adult (one size fits most)
Materials:	Corrosion Resistant Hardware and Synthetic Materials
Flotation:	Buoyancy 70lbs, uses (2) 33 gram CO2 cylinders
Service Life:	On Condition (Ultimate - 10 years from date of manufacture)
