

237 Water Rescue Throwline 75ft

This improved model, the #237-P Professional Throwline Bag, is constructed from UV resistant polyester. It contains an Ethafoam flotation insert and a quick release buckle on the handle strap. Each professional bag contains 75' of 1/2" water rescue rope (item # 503), with a 16-strand kernmantle construction for improved grip and abrasion protection.

If you're in the Coast Guard and recently received our rescue throw line – part # 237-P – you may have noticed it looks different than it used to. We promise it is the same thing, only better! In the last year alone we have shipped out over fifteen hundred 237-P Rescue Throwlines around the world. We are always striving to make our products better, so we have listened to the customer's feedback and came up with improvements for the device.
