

## #220-9 #220-9-10 #220-9-5

The newly designed Lifesaving System weight bag series: constructed of a Ballistic Denier Nylon outer covering, an opposing seam yellow inner casing, a NEW Kevlar reinforced lower half to aid in the prevention of "Blowout" and chaffing, and an Auto-Locking dual stage swivel carabiner to aid in hoist hook rollout potential. The weight bag series consists of 5lb, 10lb and 15lb weights to give the user the option to increase hoist hook stabilization depending on the conditions in which they are operating in. Hi-Visibility SOLAS grade retroreflective tape, and elastic slots for Chemlight attachment for low-light and nighttime operations have also been added. Personnel must be trained in the proper and safe use of this item.
